skills

- HTML/CSS
- React
- JavaScript
- Progressive Web Apps (PWAs)
- JQuery
- Node
- Express servers
- MongoDB
- MySQL
- Sequelize

projects

Day Planner

github: https://github.com/BTDubbzzz/athletics-admin
Deployed: https://abc-myteam.herokuapp.com/login

myTeam is an athletics program management system that allows players, coaches, and admins to focus on the game, rather than team administration. Player and team management modules allow administrators to roster players and assign coaches, and the scheduling and announcement modules make organizing a breeze. No more group texts or shared calenders - everything you need is right here.

Holiday Search

github: Https://abdale88.github.io/05_Work_Schedule/
Deployed: https://github.com/gannacon/Project_1

Second Project For this project we created a holiday searching app that will allow the user to search by country, month, and day to retrieve what holiday is on that day using the Holiday API. Then there will be a button that will allow the user to learn more about that holiday through the wikipedia API.

Education

Bootcamp Certificate: Kansas University, Overland Park, KS

A 24-week intensive program focused on gaining technical programming skills in HTML5, CSS3, Javascript, JQuery, Bootstrap, Firebase, Node Js, MySQL, MongoDB, Express, Handelbars.js & Rea
